

## A LETTER FROM ALEJANDRO

When I first started, I was feeling a way I have never felt before. It was a mix of a lot of feelings which would like a long time to explain. I didn't know what to and there were a lot of thoughts in my head, but these were negative thoughts like did I dress wrong and things like that. The main thing that helped me calm down was the teachers, they definitely helped me calm down.

I choose Trinity because 1. My brother went to this school and 2. It was the closest school. But what actually got me excited was when my brother would come and tell me how well he did with his exams, I want to be just like him. So I went to the same school because I know I will do good like him. Transition was actually fine because I had gone to summer school, I knew where everything was. That is one of the things I like about Trinity, they always have you ready for any changes.

It took me a while to make friends but I found out people had the same interest as me so it wasn't difficult. I know some people it takes time to be comfortable around someone you just met.

I was amazed at the amount of clubs there are, and such a big variety. Sports, science, rugby, choir and basketball. My favourite subject is English and Art because I always wanted to make my own book, illustrated by me, written by me and edited by me.

If I had one piece of advice to give to the next year, it would be to not be nervous because it will be fine and as our school vision says "Live life in all its fullness" they will understand soon enough that it will be good.

## A LETTER FROM RENEE

Hello, my name is Renee, I am one of the year 7 pupils and I will be sharing with you my experience and a little bit of advice for future year 7's.

Coming from my junior school which was Trinity Primary, to the secondary is a big step and I imagine you'd think I was worried, but actually I was excited. It was a huge opportunity to be the best I could be and live up to our Trinity ethos, to live life in all its fullness. The entire first day was all about making sure I knew what was expected of us inside school and outside and making sure we were prepared for when the bigger kids came. I personally think it was extremely nice of the teachers to start school a day before the original date, just so we could adjust.

Our lessons are amazing and defiantly harder than the primary but all of the teachers are so nice. I can say this without doubt, my favourite adult in the school is Miss Hollett and my favourite subject is technology. Miss Hollett taught us Food Tech in the primary for a few weeks while we were in year 5 and it was amazing. The only way you can tell that Trinity is the best school you'll ever come into contact with is through the pupils who are caring and kind and very intelligent. I've bonded with a few of them and even in lessons. Lastly, that piece of advice for future year 7's. Try your best not to lose your things. It is terrible and I learn that the hard way,  
Good luck!
